SprayMax®

2K High Speed Clear

321 g NET WT. 11.3 oz

Part. No. 3680069

Product

Description / Purpose

2K clear coat with very short drying time and very high chemical, gasoline and weathering resistance for high quality and longterm sealing of repair paint jobs and new paint jobs on cars and motorcycles.

Properties

- Dries very quickly
- Very smooth levelling
- Lasting high gloss
- Maximum resistance to abrasion and scratching
- No colour deviation
- · Outstanding painting surface
- Very good polish ability
- Suitable even at lower ambient temperatures
- · Ideally suited for small surfaces

Material base Two-component acrylic resins

Activator: aliphatic isocyanates

Colour Transparent

Gloss level gloss

90 gloss units at 20° measuring angle

Solid content approx. 34 % by weight relating to the diluted paint

EPA/CARB Coating Category TWC Two Component Coating

PWR Limit 1.20

Substrate

Solvent and waterborne base coat systems, old paint coats dried according to manufacturer's instructions (cleaned and sanded).

Processing

Protection measures

Wear personal protection equipment.

(respiratory mask / gloves / goggles)

For more information, see safety data sheet.

Shake

Before activating, shake can thoroughly for 2 minutes from when the mixing balls are heard.

Place red button

Remove the button from the cap and place it on the pin at the base of the can. Place the can with the button facing down, vertically on a firm, horizontal surface.

Press red button

Press the can down with the heel of your hand, applying even pressure. Listen for cracking sound. Only press once.

Shake

After activating the hardener, shake the spray can again for 2 minutes, again from when the mixing balls are heard.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

6 - 8 inches / 15 - 20 cm

Spray passes

Dry film thickness 1.6 -2.3 mil (40 - 60 μ m) (approx. 1,5 spray coats without flash off time or 2 spray coats with flash off time)

Flash-off time

Flash time: approx. 3 min between each spray coat

Processing conditions

Optimum application at 64° F - 77° F (18° C - 25° C) and a relative humidity from 40 - 60 %.

Coverage

approx. 3.2 - 5.8 sq ft (0,3 - 0,5 m²) / aerosol at approx.1.2 - 2.0 mil (30 - 50 μ m) dry film thickness

Drying

dust dry: 10 - 15 min dry to touch: 2 - 3 h

Ready for polishing: over night

The stated values refer to the above mentioned processing conditions. The level of dryness is determined pursuant to DIN 53150.

IR-drying possible, Observe equipment description 10 - 15 min flash off at room temperature, afterwards IR drying:

approx. 10 - 20 min at 60° C object temperature approx. 30 - 45 min at 40° C object temperature Ready for polishing: after cooling down and curing

Pot life

Approx. 8 h at 68° F (20° C) room temperature and a relative humidity of approx. 40 - 50 %.

The processing time depends on the ambient temperature. Higher temperatures reduce the pot life, lower temperatures will prolong it.

Finish

After painting, turn the can upside down and spray for 3 - 5 seconds to clean the valve.

Additional Information

Important Information

Avoid bumps, friction and impact.

Shelf Life

36 months (not activated)

The usage period refers to an unused can that is stored correctly at a temperature of 68° F / 20° C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

Note

For professional use only.
