**SprayMax®**  
**1K FillClean 400 ml für 1K**  
**Water-borne basecoat**  
**Serie C**  
**Art. Nr. 682077**

## Product

### Description / Purpose

Spray can pre-filled with propellant and solvent for one filling of 1K water-borne base coats using a FillClean filling device. Highly suitable for: De Beer Serie 900 Waterbase, Cromax Wasserbasislack, Glasurit Reihe 90 has to be mixed in advance with the recommended additiv, RM Onyx HD has to be mixed in advance with the recommended additiv.

Filling with a filling unit: Slightly twist and remove the spray head and fill the can with 100 ml of undiluted paint without hardener additives using the specified filling unit. We recommend sieving the paint before filling into the filling cap or funnel. Please observe the instructions provided by the equipment manufacturer. Replace the spray head by twisting slightly after filling. Then tune the can upside down and spray 1 - 2 times briefly. This cleans the valve and the riser and guarantees the function. Replace the cap and note the colour code and filling quantity on the can if necessary.

### VOC Value (EU)

Filling quantity: 100 ml  
692 g/l

## Substrate

Primed, filled areas and well preserved factory or old paint (cleaned and sanded).

The damaged area must be dry and free of grease and dust and all rust needs to be removed.

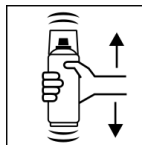

## Processing

### Protection measures

Wear personal protection equipment.  
(respiratory mask/gloves/goggles)  
For more information, see safety data sheet.

### Shake

After filling, shake can thoroughly for at least 2 minutes from when the mixing balls are heard.

### Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

### Spraying distance

15 cm - 20 cm

### Spray passes

Dry film thickness 20 - 30 µm  
(approx. 1 - 2 spray coats)

### Flash-off time

Flash time: until matt

### Processing conditions

Optimum application at 18° C - 25° C and a relative humidity from 40 - 60 %.

### Drying

Please observe the information of the paint manufacturer.

**Continue**

Can be topcoated with all conventional 1K and 2K clearcoats. Please observe information provided by the paint manufacturer.

**Pot life**

Use the water-borne paint within 5 days after it is filled in the aerosol can.

**Finish**

After painting, turn the can upside down and spray the valve until empty.

**Additional Information**

**Important Information**

Not suitable for solvent-borne paints. The use of the can filled with paint depends heavily on the filled paint material. The information refers to processing base coats and serves as general recommendations. Caution: Do not allow the spray can to stay for longer periods without the spray head as otherwise it may be difficult to attach the spray head.

**Shelf Life**

24 months (pre-gassed can that has not yet been filled with paint). The usage period refers to an unused can that is stored correctly at a temperature of 15 - 25° C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

**Disposal**

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

**Note**

For professional use only.
